DETAILED ACTION

Allowable Subject Matter

Claims 24, 25, 27, 29-35, 37-46, 48, 49, 51 and 53-60 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach a dynamic magnet system with a support system providing an unobstructed movement path for an even number of magnets wherein the moving magnets induce an electrical signal, the signal being used to power an operating system as recited in claim 24. The prior art of record does not disclose or teach a dynamic magnet system with a support system providing an unobstructed movement path for an even number of magnets in combination with ultra low friction bearings as recited in claim 30. The prior art of record does not disclose or teach a dynamic magnet system with a support system providing an unobstructed movement path for an even number of magnets where the magnets have multiple oscillation modes as recited in claim 34. The prior art of record does not disclose or teach a dynamic magnet system with a support system providing an unobstructed movement path for an even number of magnets where the system has a critical angle of displacement of less than 1 degree as recited in claim 35.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gowda et al. 4,502,700 A discloses ferrofluid used with a reciprocating shaft but the ferrofluid is used as a seal while ball bearings are used to support the shaft.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
